# BACHELOR'S DEGREE PROGRAM CIVIL ENGINEERING DEPARTMENT

Undergraduate Program of Civil Engineering has been established since 23 of October 1963 with the Department Of Civil Engineering as its first department in the Faculty of Engineering. In accordance with the curriculum, the students need to acquire minimum of 144 OUC that consist of 130 compulsory credits and 14 elective credits which can be achieved in approximately 4 years. This Program aims for Civil Engineering in general which means that there are no specification/ particular specialties in the curriculum. However, students have the flexibility to choose elective subjects, as well as their final assignment (undergraduate thesis) under five choices of disciplines: Structural Engineering, Geotechnical Engineering, Transportation Engineering, Construction Management and Water Infrastructure Engineering.
